Proposal Pilots

- Virtual Panels
 - NSF-Wide
- Preliminary Proposals for Core Programs
 - BIO/DEB
 - BIO/IOS
- One-Plus
 - SBE/BCS – Geography & Spatial Science
- Asynchronous Reviewer Discussions
 - CISE/CNS
 - MPS/PHY

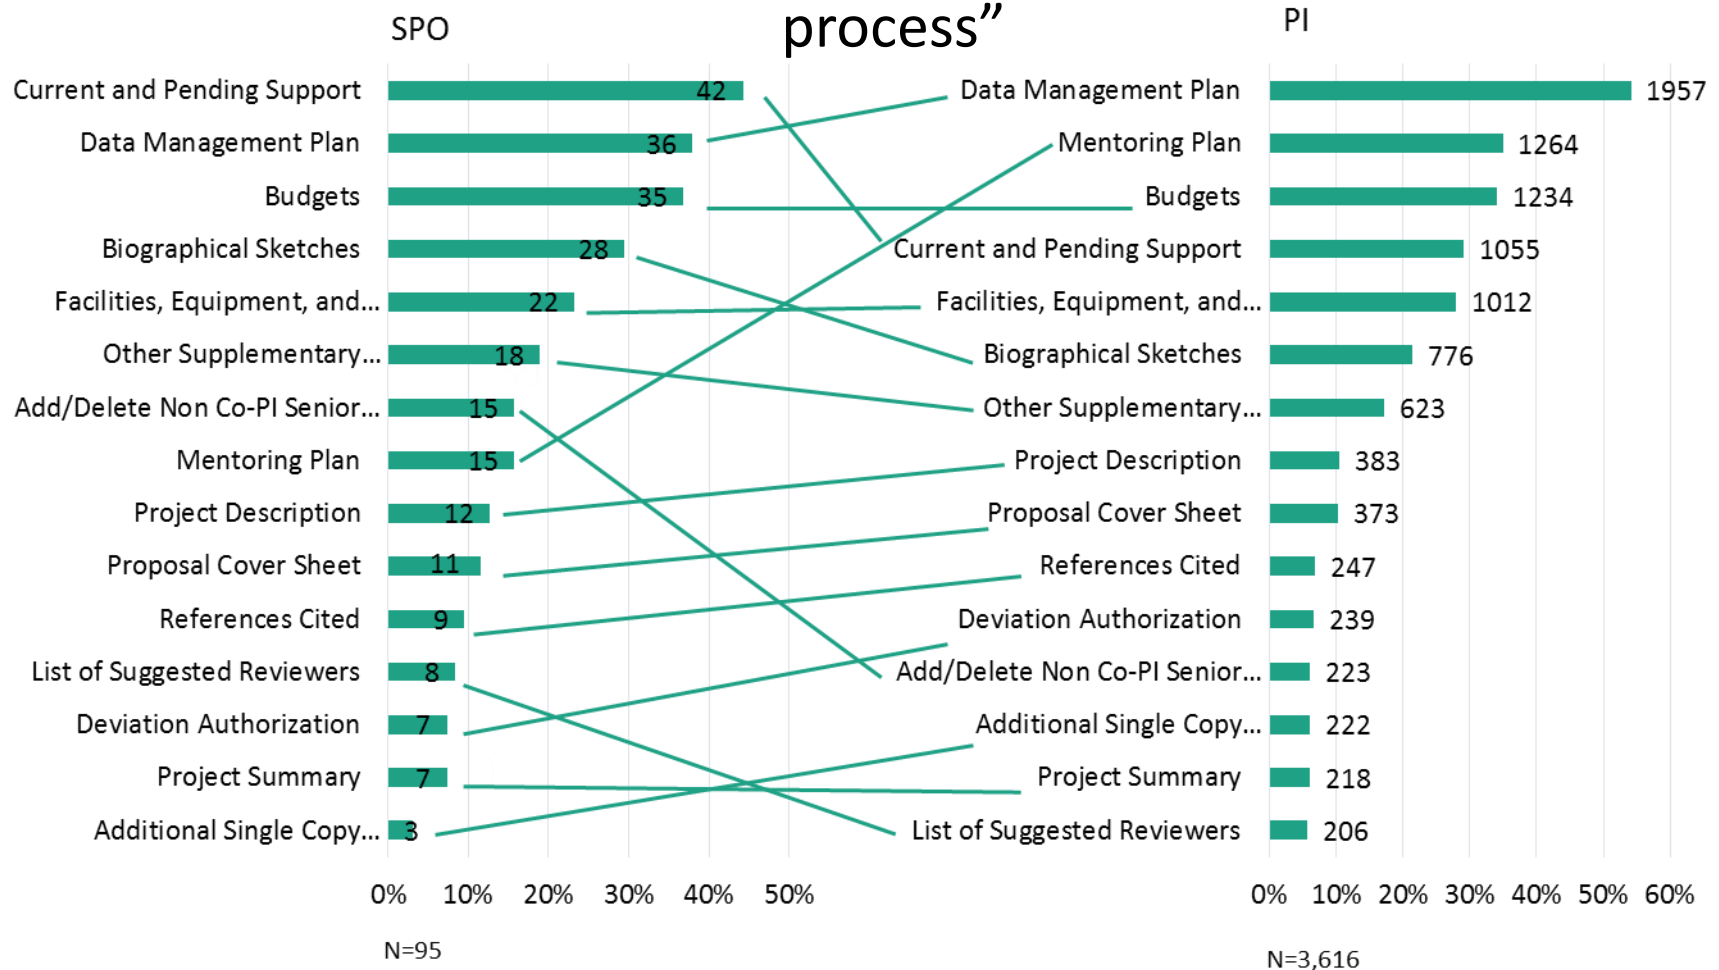

Proposal Pilots

- Mechanism Design
 - ENG/CMMI – Sensors & Sensing Systems
- Program Deadline Elimination
 - GEO/EAR – Instrumentation & Facilities
- Electronic Polling
 - MPS/AST
- College of Reviewers
 - SBE/BCS – Perception, Action & Cognition

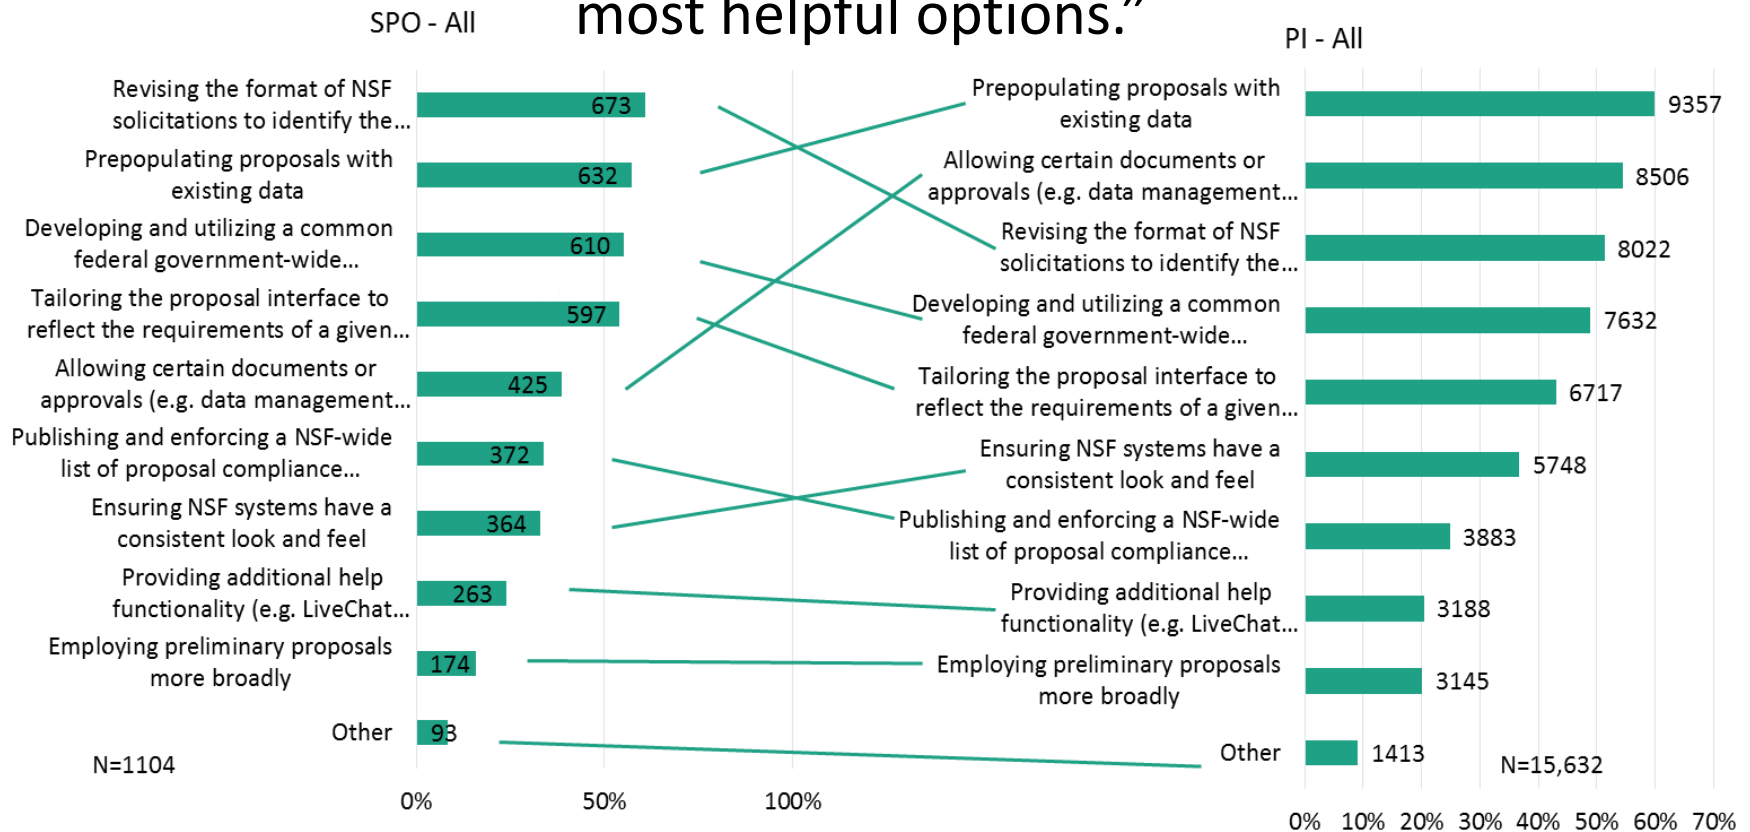

Administrative Burden Survey

“Select up to three **proposal sections** that place an unreasonable administrative burden on you during the proposal preparation process”

Administrative Burden Survey

“In general, how helpful or unhelpful would the following efforts be in reducing the administrative burden that you experience when preparing and submitting NSF proposals? Please select up to top five most helpful options.”

Administrative Burden Survey

“Rank potential efforts to **assist** in submitting compliant proposal?”
(1=less helpful, 5=more helpful) ”

Survey Summary

- Data Management Plan, Budget, Mentoring Plan, and Current and Pending Support were cited as greatest unreasonable burden.
- Data pre-population, Just-In-Time proposal section submission, and revisions of the solicitations format were cited as most helpful.
- Most helpful in submitting complaint proposals
 - Streamline Proposal Requirements (e.g., simplified budgets, phased submission of sections, standardized solicitation format, etc.)
 - Additional/improved compliance warning or error notification
 - Clarification of the compliance rules required for successful proposal submission
 - More interaction with NSF program staff
 - Enhanced FastLane help functionality

PAPPG Implementation

- Published: October 25, 2016
- Effective: January 30, 2017

Proposal Submission Modernization

- **PSM** is a multi-year initiative to modernize the proposal submission capabilities currently in FastLane and implement new capabilities in Research.gov.

Goals

- Enhance NSF proposal preparation and submission processes.
- Reduce administrative burden on PIs, organizations and NSF staff.
- Increase likelihood of proposal acceptance upon successful proposal submission in FastLane.

Approach

- Clarify policies and procedures in PAPPG.
- Standardize proposal formats.
- Further automate compliance checking.
- Reduce programmatic review to a minimum set of essential elements

Automated Proposal Compliance Checking

- NSF continues to invest in auto-compliance checking capabilities to reduce administrative burden levels on both the research community and NSF programs.
- Core PAPPG proposal section, page count, budget, and deadline requirements are checked during proposal preparation and submission activities in FastLane.
- The next release of auto-compliance checks will support additional standard proposal type requirements and include checks for new types of proposals.
- A complete listing of current FastLane checks is available at:

http://www.nsf.gov/bfa/dias/policy/autocheck/compliance_checks_july16.pdf
